Re: Intura Vision

Dear Gary,

I began using Intura (Breakaway) when I was working for Dominos Pizza about 7 years ago. When I opened my first independent pizzeria, I chose DiamondTouch because of the appealing advertising that I saw in magazines and at trade shows. I quickly realized that I had made a big mistake and shipped back the complete system at a loss of several thousand dollars.

Then I replaced it with Intura Vision. Now I am opening my 3rd store and I can honestly say that I couldn't do it without the right POS system (Intura). I have used DiamondTouch and MicroWorks but I must say that Intura Vision is the easiest and most solid system I have ever used. The pizza delivery business requires a stable system with instant execution and zero tolerance for POS downtime. Intura helps me to achieve just that.

Regards,

Tony Erol
Owner and Operator
Manginos Pizza
